MSIA Sustainability Certification Program Application for Ski Areas

The document, in hard copy or email, must be sent to MSIA. Email to: info@goskimichigan.com Mail to: MSIA, 7164 Deer Lake Court, Clarkston, MI 48346 for certification.

MSIA created its Sustainability Certification Program to enable our members to take part in ski industry sustainability efforts. MSIA's Sustainability Certification Program is designed to be a map for its members to achieve sustainability success down the trail that is right for them. All MSIA members – Ski Areas, Ski Retailers, Ski Industry Manufacturers Reps and Associate members – can become Sustainability Certified because we have created categories for ski area members and non-ski area members.

- Applications are accepted annually and must be completed by April 1 each year. The results will be for the prior winter season. As an example, applications received by April 1, 2024, will be valid to receive the certification for the 2023/24 winter. However, you don't have to wait until April to submit your application. We'll accept them anytime you're ready.
- Ski areas receiving 50 points or higher receive certification. Those receiving 75 points or more are Black Diamond certified.

Company: _		
Person con	npleting application:	
Signature o	of person completing application:	
Phone:	Email:	
Date Submi	itted:	
Category	1: General	
Possible Points		Points Earned
3	Yearly renewal of your Sustainability Certification through MSIA	
2	Establish a system for tracking your Greenhouse Gas Emissions	
5	Participate in the NSAA Climate Challenge	
1	Designate a person as the point person for your sustainability efforts	
4	Define a new reduction project your ski area took on for the year (Projects cannot be used more than once and it must have been completed in the recent year)	
Desc	cription:	
Category	2a: Energy Efficiency – Facilities and General	
3	Schedule an energy audit through your energy provider	
3	Utilize occupancy and light sensors, timers and natural lighting. (1-3 points, 100% of facilities = 3, 0% of facilities = 0)	

	Utilize energy efficient or Energy Star, appliances (1-3 points: 100%=3, 50%=2, any Energy Star appliances= 1)
5	Lighting converted to LED (1-5 points: 100%=5, 75%=4, 50%=3, 25%=2, any=1)
5	Invest in renewable energy through on-site projects, power purchase agreements, or purchasing Renewable Energy Credits that cover a measurable percentage of your ski area's energy use. (1-5 points: 100%=5, 75%=4, 50%=3, 25%=2 any=1)
Des	cription:
1	Create closing process to ensure lights and select appliances are turned off as opposed to sleep mode.
Des	cription:
gor	y 2b: Energy Efficiency – Lifts, Snowmaking, Slope Lightin
8	Set up a formal energy efficiency program for snowmaking operations.
3	Install Variable Frequency Drives on snowmaking pumphouses
3	Yearly audit all lift houses for energy efficiency; develop a plan to reduce energy usage.
5	Convert slope lighting to LED pilot (1-6 pts: 100%=5, 75%=4, 50%=3, 25%=2, any=1)
1	Upgrade to automated high efficiency snow guns for snowmaking operations.
1	Maximize use of dirt or other materials to pre-form slopes and terrain to minimize the amount of snow needed.
gor	y 3: Managing Waste
	y 3: Managing Waste Establish a comprehensive recycling program (plastic, aluminum, glass, paper, cardboard)
2	
2	Establish a comprehensive recycling program (plastic, aluminum, glass, paper, cardboard)
2 2 1	Establish a comprehensive recycling program (plastic, aluminum, glass, paper, cardboard) Implement a composting program
2 2 1	Establish a comprehensive recycling program (plastic, aluminum, glass, paper, cardboard) Implement a composting program Conduct a waste audit to see where waste could be reduced. cription:
2 2 1	Establish a comprehensive recycling program (plastic, aluminum, glass, paper, cardboard) Implement a composting program Conduct a waste audit to see where waste could be reduced.

	K-cups, plastic straws, plastic bags, etc.
1	Create a program to properly dispose of hazardous materials (batteries, fluorescent light bulbs, oil, chemicals, installation of an oil/water separator etc.)
gory	4: Environmental Protection
1	Commit to prioritizing buying local when the opportunity is possible and viable. Establish a program to purchase products and services from local Michigan companies whenever possible
2	Conduct a water audit, and then institute a water management program that focuses on water savings. This may include any or all the following: glasses of water only upon request at restaurants, installing efficient flush toilets/urinals/shower heads/faucets, drought-tolerant plantings, annual analysis, and maintenance of septic system (if you have a septic system), replace water pipes (for irrigation, snowmaking, hotel use etc.) that leak or are too small for energy efficiency, etc. 1pt - conducted audit, 2pts - implementing
2	Invest in new projects or improvements that integrate storm management practices to improve stormwater runoff quality and/or develop a system to collect precipitation to use for snowmaking or irrigation.
1	Plant regionally appropriate trees and vegetation to support healthy habitats, reduce erosion, and act as a carbon sink.
1	Develop a comprehensive wildlife management plan that establishes goals and strategies for protecting wildlife and reducing conflicts with wildlife at the ski area.
Descr	ption:
1	Conduct a forest and vegetation audit. Prioritize opportunities and target areas to reduce disturbance and/or improve forest health and habitat quality.
1	Minimize forest disturbance in future ski area development plans and/or implement new strategies to decrease forest disturbance within existing operations.
1	Develop and implement wildfire mitigation and forest management best practices in collaboration with local, state, or federal land management agencies, fire departments, and neighboring communities.

Category 5: Transportation

	Install electric charging station(s)
2	Integrate electric vehicles (on-road or off-road vehicles and equipment) into your ski area fleet, whether through piloting EV vehicles or upgrading your current fleet. (1pt - pilot vehicles, 2pts - upgrade at least 20% of fleet.)
1	Install at least one electric vehicle charging station that is just for fleet vehicle and equipment use, not accessible to the public.
2	Upgrade most of your ski area snow cats to tier 4 models
4	Establish a no-idle policy for all fleet vehicles
Des	scription:
2	Install a fuel tracking and/or fleet management system
1	Improve multi-modal transportation infrastructure within the ski area to make transit, resort shuttle, or other non-vehicular transportation modes easier and more convenient. This may include sidewalks, transit stops, enhanced shuttle service, bike racks, wayfinding or route signage and other improvements that facilitate walking, cycling and transit use by employees and guests.
